
SQC – Steam to Steam Quality Controller

U.S. PATENT #9,453,693

Features

- This unique approach does not require RO or city water and guarantees over 97% quality steam to STERILIZERS and process
- Horizontal or vertical U-tube heat exchanger
- NEMA 4 control panel with an advanced programmable controller, graphic HMI display including BACnet, Lon, Modbus compatibility and remote access as well as integrated sensor and control capability to guarantee over 97% quality steam to the user independently of the base quality steam at the heat exchanger inlet. **We are Internet of Things (IOT) ready with a OPC-UA embedded server**
